The multiple national award winning Sanofi Waterford biopharmaceutical and medical device campus is located in Waterford on Ireland's southeast coast.

HERE'S WHAT SOME PAST PARTICIPANTS HAVE HAD TO SAY ABOUT THEIR EXPERIENCE OF OUR WORK PLACEMENT PROGRAMME

I have just completed an eight month placement at Sanofi. My role in Sanofi was as a process engineer, which involved me working with a diverse team in the Fill Finish function. I found my time at Sanofi extremely beneficial as the role exposed me to many different areas and helped me to understand how each department is interconnected. This exposure helped me develop some of the key skills required to become a successful engineer.

I was given two major projects to be completed over the course of my placement and I linked in with two of the Fill Finish team's process engineers who assigned tasks to me. I would highly recommend an internship in Sanofi as I gained a great insight into how the pharmaceutical industry operates and grew in confidence throughout my time here.

JOHN DUNLEAVY
University of Limerick

My role in Sanofi was a QC microbiologist working as part of a diverse team in the Quality dept. Throughout my placement the company and the people within it were always on hand to help guide me. As part of my role in Sanofi I got exposure to many different areas and worked as part of cross functional teams within the company.

At first, it's a bit overwhelming as I had never worked in such a large pharmaceutical company, but everyone was extremely welcoming and helped me settle into the company. Sanofi provided me with exposure to many different test methods and pipeline projects within the company. I gained great insight into the processes behind pharmaceutical product creation, from drug development to finished product.

Personally, I thoroughly enjoyed my placement here at Sanofi and would highly recommend it.

SARAH JOYCE,
University College Cork
